

Accounting for the Environment: Energy

Overview/Description

Accounting for Energy – An Operational and Strategic Imperative will provide you with the skills, knowledge and tools to successfully manage the energy-related issues that affect your role. This course will help you to recognise and deal with the risks in energy management and help you identify the opportunities that also exist in Australia, allowing you to operate more strategically and to contribute to your organisation's sustainability objectives.

Target Audience

- Accountants in business or in Practice
- Company Business Managers

Prerequisites

None

Expected Duration

90 Minutes for the online Modules.

Course Objectives

By the end of this course, you will be able to:

- Recognise the key issues driving the need to better account for and manage energy consumption and costs
- Carry out a structured energy information analysis process
- Address energy risks & opportunities
- Assess the viability of energy projects and initiatives
- Link energy costs to your financial reports
- Contribute to your organisation's strategic objectives

Continuing Professional Development

This course can contribute credits towards Continuing Professional Development for members of CPA Australia, the Institute of Chartered Accountants, the Institute of Public Accountants and ACCA Australia.

Resources

The course includes a number of resources which you will have access to throughout your training to support you in applying the knowledge and skills from the course. These include:

- Downloadable Excel templates
- Access to blogs and experts
- Current whitepapers

Note: On line courses will be updated by Greenstreets experts if legislation changes and will be made available to users at no additional investment during the licensed term.
