

Accounting for the Environment: Transport

Overview/Description

Accounting for Transport – Cost Centre Analysis & Transport Management Planning builds upon the unique skillsets which you have developed, as an accountant, to help you to better manage your organisation's transport costs. It will show you how to evaluate opportunities in relation to transport management and mitigate risks which may result in increased costs or brand damage. This course will bring value to your role, enabling you to operate more strategically and contribute to your organisation's sustainability objectives.

Target Audience

- Accountants in business or in Practice
- Company Business Managers

Prerequisites

None

Expected Duration

90 Minutes for the online Modules.

Course Objectives

By the end of this course, you will be able to:

- Understand transport management in context of Australian and global drivers
- Carry out a structured information analysis process
- Address transport risks & opportunities
- Evaluate the feasibility of proposed transport initiatives
- Link transport costs to your financial reports
- Prepare information for carbon and sustainability reports as they relate to transport

Continuing Professional Development

This course can contribute credits towards Continuing Professional Development for members of CPA Australia, the Institute of Chartered Accountants, the Institute of Public Accountants and ACCA Australia.

Resources

The course includes a number of resources which you will have access to throughout your training to support you in applying the knowledge and skills from the course. These include:

- Downloadable excel templates
- Access to blogs and experts
- Current whitepapers

Note: On line courses will be updated by Greenstreets experts if legislation changes and will be made available to users at no additional investment during the licensed term.
